Communication Test Procedure

Push keypad *CMD* button until *MENU NO YES* appears on screen.

Push top row button under *YES*

ENTER CODE- will appear on screen.

Enter your user code on the keypad.

SENSOR RESET? will appear on screen.

Push the keypad *CMD* button until *SYSTEM TEST* appears on screen

Push any top row key to initiate the system test.

The siren will sound for 3 seconds, then the keypad for 3 seconds.

The back-up battery will test. A *BATTERY OK* message indicates good battery condition.

If *BATTERY LOW* or *BATTERY TRBL* appear on the screen, battery replacement is needed.

TRANSMIT TEST will appear on the screen while a test signal is sent to the monitoring center.

This will not cause an alarm signal to be sent, only a test signal.

If communication was successful, *TRANSMIT OK* will appear on the screen. The system will

then return to normal operation.

If *TRANSMIT FAIL* appears, you should contact VEI Protective Services at 812-886-5790 to schedule a service call.
